Re: Docket No. 2005-385, E Order no. 2006-680

Sir or Madam,

This letter is to request regulations allowing residential power customers in South Carolina to be able to sell surplus power back to the grid, in order to encourage solar and other renewable energy technologies. We can no longer afford the luxuries of the fossil fuel era; the specter of global climate change mandates that we do whatever we can to begin to deal with this problem. Since most of our power is fossil fuel generated, this is a good place to start. Empowering the homeowner will help us as individuals to begin to deal with this serious problem. 35 other states have already taken this step. The technology is available to do this properly. Let's allow South Carolinians to be participants instead of bystanders.

Sincerely,

Joseph C. Moore, Jr.
